## PROFESSIONAL SUMMARY

Completed B.E. in Computer Science and Engineering at MIT, Anna University, with hands-on experience in developing efficient software systems and AI-driven solutions. Passionate about building reliable applications that solve meaningful problems. Eager to contribute as a Software Engineer in agile, fast-paced environments that value innovation, collaboration, and continuous learning.

## TECHNICAL SKILLS

- **Languages:** Python, Java, C
- **Web Development:** HTML, CSS, JavaScript, React
- **Databases:** MySQL, SQL, MongoDB
- **Tools & Platforms:** Git, Google Colab, Jira, Power BI, Microsoft Excel
- **Design:** Figma, Canva, Photoshop
- **Concepts:** Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Database Management System, Software Engineering

## EDUCATION

### MADRAS INSTITUTE OF TECHNOLOGY

BE Computer Science and Engineering

CGPA - 9.04 | 2022 - 2026

### ST. MARKS MATRICULATION HIGHER SECONDARY SCHOOL

Higher Secondary

97.3% | 2020 - 2022

### ST. MARKS MATRICULATION HIGHER SECONDARY SCHOOL

SSLC

91% | 2019 - 2020

## ACHIEVEMENTS & CERTIFICATIONS

- **Winner** – Paper Presentation: “Voice-Activated News Reader”, IIT Bombay FOSSEE – AAI Geospatial Mapathon, Detective SQL
- **Certified** – Web Development (MyCaptain), AI Tools (Naan Mudhalvan), WordPress (Coursera)
- **Organizer** – Data Maze (Tech Event) & Full Stack Development Workshop

## KEY STRENGTHS

- Problem Solving
- Communication (Verbal & Written)
- Time Management
- Creativity
- Team Management
- Attention to Detail
- Agile
- Scalable Thinking

## PROJECTS

### SEPSIS EARLY WARNING SYSTEM

APR - 2026

**Tech Stack :** Python, PatchTST, Time-Series Modeling, LLM

- Designed a dual-expert Mixture of Experts model for early sepsis prediction.
- Processed multivariate time-series data to detect early risk and classify severity levels.
- Integrated an LLM module for interpretable risk explanations and improved decision support.

### FALL DETECTION SYSTEM

APR - 2025

**Tech Stack :** Python, PyTorch, YOLOv5, ResNet50

- Trained a deep learning model to detect and categorize human falls using RGB video input.
- Evaluated model performance on RGB video data and analyzed its effectiveness in detecting fall events.
- Achieved 87% accuracy on the LE2I dataset; classified fall severity into mild, moderate, and severe.

### COLLABORATIVE CODE EDITOR

DEC - 2024

**Tech Stack :** Java, JavaScript, WebSocket

- Implemented a real-time, multi-user code editor with live synchronization using WebSocket.
- Enhanced user experience with dynamic syntax highlighting via Monaco Editor.
- Structured the codebase for scalability and future modular feature expansion.

### SECURE MESSAGING VIA STEGANOGRAPHY

DEC - 2024

**Tech Stack :** Python, HTML, CSS, AES, LSB Steganography

- Developed a secure messaging tool embedding encrypted text within image files using LSB steganography.
- Implemented the encryption, steganography, and frontend components.

## LANGUAGES KNOWN

- English • Tamil • Hindi (Basic)
